PROFESSIONAL SUMMARY

- Tenth-semester Systems Engineering student and Software Development Technologist focused on data analytics, SQL, Python, visualization, automation and software development for real operational workflows.
- I have built projects in executive dashboards, operational software, augmented reality and applied AI prototypes, combining technical execution with real business context from the optical sector.

EDUCATION

- Universidad Tecnológica de Santander | Systems Engineering | Tenth semester
- Universidad Tecnológica de Santander | Software Development Technologist

TECHNICAL SKILLS

- Data and analytics: Excel, Python, SQL, Tableau, Power BI, Pandas, NumPy, data cleaning, EDA, dashboards, data storytelling.
- Databases: PostgreSQL, MySQL, NoSQL, relational modeling, queries, normalization, CRUD, Prisma ORM.
- Software development: JavaScript, TypeScript, React, Vite, Node.js, NestJS, HTML, CSS, REST APIs, Git, GitHub, Docker.
- AI and machine learning: Scikit-learn, TensorFlow, Keras, supervised models, model evaluation, dataset preparation, automation and AI applied to processes.
- AR and mobile: Unity, C#, Vuforia, AR Foundation, ARCore, face tracking, image targets, React Native, Expo.

SELECTED PROJECTS

- Optica Suite | Built a web suite for commercial, clinical and logistics workflows in optical businesses, including patients, appointments, sales, clinical records, lab orders, cash management, audit logs and reporting. Stack: NestJS, Prisma, PostgreSQL, React, Vite, TypeScript and Docker.
- HR Dashboard in Tableau | Built executive and detailed HR analytics dashboards covering headcount, hiring, terminations and department distribution, supported by a structured dataset and formal documentation.
- AR Monturas | Developed a Unity Android application with 3D catalog exploration, image target recognition and experimental face tracking for optical frame try-on experiences. Stack: Unity, C#, Vuforia, AR Foundation and ARCore.
- Habits + Finance App | Built a product-oriented mobile app for habits, personal finance and gamified progress using Expo, React Native, TypeScript, Zustand and local persistence.
- Data Lake Practice | Ongoing project to practice data architecture, ETL and layered organization using raw, processed and consumption-ready data structures.

RELEVANT EXPERIENCE

- Optical business owner and administrator | 2 years | Managed inventory, suppliers, cash flow, customer service and commercial operations, identifying real workflow needs that later became software requirements and solutions.

CERTIFICATIONS

- Google Data Analytics and Google Advanced Data Analytics.
- EF SET English Certificate 62/100 | C1 Advanced.
- PCAP: Programming Essentials in Python | Cisco Networking Academy.
- IBM pathway in AI, cybersecurity, emerging technologies, digital mindset and AI-assisted employability.

LANGUAGES

- Spanish | Native.

- English | C1 | EF SET.
