PROFESSIONAL SUMMARY

- Tenth-semester Systems Engineering student and Software Development Technologist focused on data analytics, SQL, Python, Excel, visualization and machine learning applied to real problems.
- My profile is centered on turning information into dashboards, analysis, decision support and automation. Software development works as a complement that helps transform analytical work into usable solutions.

EDUCATION

- Universidad Tecnológica de Santander | Systems Engineering | Tenth semester
- Universidad Tecnológica de Santander | Software Development Technologist

TECHNICAL SKILLS

- Data and BI: Excel, SQL, Python, Tableau, Power BI, dashboards, data storytelling, exploratory data analysis, data cleaning.
- Databases: PostgreSQL, MySQL, NoSQL, relational modeling, queries, normalization, CRUD, practice in data architecture and data lake structure.
- Machine learning and AI: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, supervised models, basic neural networks, CNN experimentation, model evaluation, dataset preparation.
- Software as a complement: JavaScript, TypeScript, React, Node.js, NestJS, REST APIs, Git, GitHub and Docker to turn analysis and automation into usable products.

DATA-RELEVANT PROJECTS

- HR Dashboard in Tableau | Built executive and detailed HR analytics dashboards with metrics for headcount, hiring, terminations and department distribution, supported by a structured dataset, mockups and documentation.
- Data Lake Practice | Ongoing project to practice raw, processed and consumption-ready layering, data architecture criteria and ETL-oriented thinking for analytics.
- AI and data analysis | Worked on exercises and prototypes with text, audio and video datasets to strengthen data cleaning, EDA, supervised models, basic neural networks and CNN experimentation.
- Optica Suite | Although primarily a software project, it involved working with operational data structures, traceability, reporting and real information needs in an optical business.

RELEVANT EXPERIENCE

- Optical business owner and administrator | 2 years | Managed inventory, suppliers, cash flow, customer service and commercial operations, developing strong business awareness and understanding of operational data, reporting and real tracking needs.

CERTIFICATIONS

- Google Data Analytics and Google Advanced Data Analytics.
- EF SET English Certificate 62/100 | C1 Advanced.
- PCAP: Programming Essentials in Python | Cisco Networking Academy.
- IBM pathway in AI, cybersecurity, emerging technologies, digital mindset and AI-assisted employability.

LANGUAGES

- Spanish | Native.
- English | C1 | EF SET.
